

## Should You Invest In Interior Car Detailing?

A few decades back, owning a car was a sign of affluence and luxurious life. In those days, [car detailing in St George, Utah](#) was not paid much attention because of the triviality of car detailing back then. These days, the neatness of one's car is considered as the reflection of one's discipline, diligence, and care. People are more driven towards maintaining their cars than ever. In addition, these days, maintenance of cars is quite imperative as the interiors and exteriors of cars are quite complex and need special care to keep them functioning smoothly.

Car detailing is the meticulous cleaning and reconditioning of the car with specific tools and products. The process is usually carried out manually and the intent is to make the car look like a new one. Paintwork and repairing are not included in car detailing. On the other hand, car washing is superficial cleaning of the car by an automated wash system.

### Advantages of Car Detailing

It adds to the lifespan of the car

It adds to the resale value

It enhances the appearance of the car

It improves the paint condition of the car by reducing scratches

It conditions the engine to function cooler

### Phases of Car Detailing

Car detailing is carried out in two phases, interior and exterior detailing.

### Interior Detailing

Amongst the interiors and exteriors of the car, interiors require greater effort to clean them. Interiors are way filthier than they seem to the naked eyes. The process of interior car detailing includes:

#### Cleaning the engine bay

More often than not, the engine is snubbed in interior car detailing. But experienced [St George automotive detailing](#) professionals know the significance of detailing the engine bay. The engine is thoroughly sprayed with water, wiped with a de-greaser, and then rinsed. Once the engine is completely dried, it is properly applied with a coating to protect the rubber and silicone parts.

#### Vacuuming and Shampooing

Vacuuming the interiors with a vacuum cleaner makes sure the removal of all sorts of dirt including the ones that are not easily visible to the naked eye. The carpet of the car if swamped with smears and stains that are almost impossible to get rid of by regular brushing. Shampooing the carpet helps dilute the strong stains and wash them away.

#### Cleaning the glasses

This is usually done with a specific glass cleaner to make sure the retention of the sparkling and shine of the glasses so that the view of the driver is not compromised at all.

### **Leather Cleaning**

A special leather cleaner and soap are utilized for this purpose to keep the authentic comfort of the leather alive.

### **Cleaning the dashboard, plastic components, and the windows**

A clean piece of cloth is used with a cleaning detergent to wipe the plastic components, windows, and the dashboard. After wiping a special polish is applied to restore the shine.
